SO WHAT DOES THIS MEAN FOR YOU?

If you are in need of dental implants, gum disease treatment or even full mouth reconstruction, we've got you covered in a major way. Our top priority is your total oral health, and every step of your journey is met with merciless technical competence that delivers an improved quality of life. You not only get the direct benefits of a

Believe in better

Cutting Edge

These are things you should expect when undergoing treatment with the

- Our approaches involve minimally invasive dentistry. Conventional dentistry involves crowns(caps) and bridges. We prefer to keep your teeth intact by doing minimally invasive porcelain restorations and dental implants. By being minimally invasive we can strengthen your teeth and help you keep them for longer.
- Our state of the art Dental Laboratory allows all dental work to be done on site where we can control the high quality end results
- We have digitally controlled dental anesthesia
- We have digital X-rays to minimize radiation to you
- We provide the revolutionary teeth in one day concept where you can go from teeth you don't like to the teeth you have always dreamed of.
- We have convenient hours and ensure ultimate privacy for our celebrity clients
- Our team is extremely well trained to take care of your every need.
- We use digital scanning and CT scan technology to ensure any dental implant surgery is minimally invasive
- We love our patients

healthy mouth, you also get all the goodies that come along... increased confidence, improved physical well-being, and the ability to smile freely.

At Anacapa, our greatest goal is to provide relief. If you're in need of a lasting, stable dental solution, it's time to get the quality care you deserve.

Award-winning and world- renowned prosthodontist, Drs. Jivraj and Reshad deliver enhanced self-confidence through the delicate yet rugged art of dental reconstruction.

With experience in both partial and full mouth reconstruction, our prosthodontists routinely give patients relief from the imperfections that concern them most, including missing teeth, periodontal disease, bone loss and other major complications. As most dental reconstruction addresses cosmetic and functional issues simultaneously, patients benefit from a multi-faceted improvement in their quality of life.

One of the country's top prosthodontists. Dr. Jivraj is one of the most influential leaders in his field. Having delivered cutting-edge dental and prosthodontic care for over two decades, he's won the respect of both his colleagues and patients – and in 2008 was voted “Best in USA” by a panel of his peers.

Educated as a Doctor of Dental Surgery at the prestigious University of Manchester, Dr. Jivraj also studied at the world- renowned Herman School of Dentistry at the University of Southern California. While there, he trained in advanced techniques and procedures for reconstructive and earned his degree as a certified Prosthodontist. He is an expert in the replacement and restoration of teeth.
